GB Suitable for 2 x 1.5 V AAA batteries (not included). Open the battery compartment. Insert the batteries. Make sure the polarity (+/-) is correct. To turn on, slide the switch to ON Be careful with batteries! Leaking battery acid can cause chemical burns. Avoid contact of battery acid with skin, eyes and mucous membranes. If you come into contact with battery acid, immediately rinse the affected areas with plenty of clean water and seek medical attention if necessary. Batteries (especially lithium batteries) can explode if handled improperly. Never try to charge batteries. Only use batteries of the same or equivalent type. Batteries must not be heated, short-circuited or disposed of by burning. Do not expose them to direct sunlight. Old devices must not be disposed of in household waste! If the product can no longer be used, every consumer is legally obliged to dispose of old devices separately from household waste and, for example, to hand them in at a collection point in their community/district. Old electrical devices are accepted there free of charge. This ensures that old devices are properly recycled and negative effects on the environment are avoided. Batteries and rechargeable batteries must not be disposed of in household waste! As a consumer, you are legally obliged to hand in all batteries and rechargeable batteries, regardless of whether they contain harmful substances* or not, to a collection point in your community/district or to a retailer so that they can be disposed of in an environmentally friendly manner. *marked with Cd = cadmium, Hg = mercury, Pb = lead HDC Heim Decor GmbH Mühlenweg 144 22844 Norderstedt support@Heim-Decor.de	GB Suitable for 2 x 1.5 V AAA batteries (not included).
